Eric's Animal Rehoming Community Service

Do you, or someone you know have an unwanted reptile, amphibian, or terrestrial invertebrate in need of rehoming or assistance? I may be able to help! I have over 20 years of experience keeping and caring for reptiles and amphibians, and references can also be provided upon request. No fees required. Located in Madison, WI.

All animals surrendered will be screened for health and temperament, and then be placed into approved homes with private individuals or members of educational organizations or institutions, or re-released if native.

Specializing In:

- Pet Store Surrenders and Transfers
- Abandonment and Lost & Found Cases
- Urgent Rehoming Cases
- Other Organizational Transfers or Points of Contact
- Wild or Native Snake/Other Reptile & Amphibian Identification, Rescue and Relocation

Most species accepted and considered, with restrictions on a case by case basis. Unfortunately, due to space and legal considerations, I cannot accept most aquatic turtles, large tortoises, venomous reptiles, green iguanas, or large boas/pythons. Special referrals required for crocodilians. I also am unable to take in animals which may require veterinary or other specific long-term medical care. To explore further options in these cases, contact me below for further details.
